### 📄 Profile

Experienced IT professional with a foundation in Navy HR data management, now established in Systems Administration through hands-on infrastructure and cloud support roles. Leveraging robust certifications in Linux, Security, Networking, and Cloud, I am advancing to mid-level positions in IT operations

### 📁 Professional Experience

**Infrastructure and Experience Specialist, Wipro (Supporting the Microsoft Innovation Hub)** 07/2024 – Present  
Redmond, WA

- Provided AV and virtual engagement support via Teams, including setup for briefings, workshops, and events.
- Configured and managed Azure Virtual Machines, hybrid cloud environments, identity/governance, storage, compute, and virtual networks for POCs and engagements.
- Supported Microsoft enterprise software (OS, Office, Teams Room) and third-party tools/drivers.
- Provided on-site smart hands support for core network and compute infrastructure, including rack/stack, cabling, OS provisioning, and hardware decommissioning.
- Managed Layer 2 network configuration, VLAN design, monitoring, troubleshooting, and cabling management per Microsoft standards.
- Oversaw server room operations (physical space, access, power, cooling) and collaborated with internal/external teams for facility maintenance.
- Owned technical management for onsite experience demos: configured, maintained, troubleshot, and demonstrated to customers.
- Managed digital signage: provisioned, configured, supported hardware, and handled content management.

**Network Development Engineer Pre-Apprenticeship, TLG Learning** 2024  
Camp Murray, WA

Includes CompTIA Network+, CompTIA Linux+, AWS Cloud Practitioner, and Python certification and training in preparation for technical apprenticeships and/or entry-level IT positions. Resulting knowledge includes:

- Networking fundamentals, configuration, and troubleshooting.
- Linux OS hardware and system operation and maintenance.
- Python programming and scripting.
- Basic AWS infrastructure, architecture, and services.

**Personnel Specialist, U.S. Navy** 2013 – 2023  
San Diego, CA |  
Yokosuka, Japan |  
Lemoore, CA |

- Developed and implemented computerized database management systems to improve personnel tracking, resulting in increased efficiency and data accuracy.
- Performed queries, gathered data, and conducted qualitative and quantitative analyses of large, robust data sets to assess organizational activities and reporting.
- Maintained tracking systems for personnel actions, military pay, correspondence, awards, and evaluations.
- Recorded data for each employee, including such information as monthly earnings, supervisory reports on manpower, performance, training, and capital planning.
- Provided statistical analysis for the development of command objectives.
- Maintained and entered info into Enlisted Service Records, gaining personnel to new commands, transferring personnel, preparing personnel for separation/retirement.
